### PROJECT

---

Build Responsive mobile first projects using CSS, SASS, Bootstrap, Word Press and also JavaScript and Vue Dynamic class and styles for responsive purposes.

For Pre-Design I have used a variety of applications to help build the design of my project websites. This includes Web color picker websites, Adobe XD/Illustrator for design/Wire Frames/Mood Boards

Web Analytics I am very familiar with using google web analytics and surveying groups of people on performance of websites.

Updating websites, I've use FTP (File Zilla), Upload through the command land including both to git and C-Panel, and of course manual.
